

The European Section

3RS

It's about :

- ◆ The risks and consequences of global warming.
- ◆ Renewable energy

We went to Hungary where we were able to visit the energy's factories, like the refining factory.

Some activities with Mrs Bontemps have been proposed, and we organized a upcycling contest, that is to create objects with recycled materials.

Hungary

It was a beautiful trip!

We visited :

- Museum of Geography in Erd
- The city of Pécs
- The Renewable Energy Plants
- MOL Oil, a refining factory in Szazhalombatta
- a Natural reserve area in Erd

- Budapest with the castle District, Chain Bridge, the Parliament and the Shoes Memorial.

And of course, a lot of good time with our Correspondents !!!

OUBLECK

In Physic Chemistry, We have experimented and created a substance called Oobleck. We learned this origin by reading the book « Bartholomew and The Oobleck » by Dr Seuss. He told the problem of the king. Indeed, the king wanted something new to come from the sky. And he found the Oobleck. But as a solution, the king asked his magicians to create something new, and they invented the Oobleck thanks to poems and potions. This story teaches a lot of lessons. For example, it says that we cannot have everything we want because sometimes, it's impossible, then, everyone can make mistakes, even a king. We should be satisfied with what we have and stop moaning about everything. And the last one is that a problem always has a solution, but we must consider all consequences for us and others.

Dennis Kelly

He's a British playwright and he's very famous. He has a provocative and dark style. In this screenplay, he talks about several topics.

Within the cultural project with the Cart'attoo, we went to the theater to see a play which was called *Oussama, ce Héro*.

Dennis Kelly shows everybody can have moral dilemmas and can have qualities and flaws. We are all Humans. The play pushes us to not trust our judgements, but to look out for proofs.

He evokes the terrorism, the torture, the revenge and the Hero. Garry's point of view is that the hero is a person who is determined and courageous, who is ready to sacrifice his life to defend a cause and change society.

In Physics and Chemistry, we had to do a presentation on our scientist. We were in groups We explained what they discovered on the atom and other things. Then, we created a poster and a game to know if our classmates understood, we also played a game on female scientists in English class.

Gender Inequalities

We worked on a comics which called « On a plate », and it shows 2 different babies, Richard and Paula. They come from completely different families. In the last frame, Paula and Richard finally meet but she has not the same social status, she's below him. Toddy Morris wants to denounce the inequalities between males and females and mainly here between the poor and the rich. There are a lot of inequalities like social inequalities, gender inequalities, racial inequalities for example. With Courtney, we studied how to fight against gender inequalities thanks to commercials. And then, in pairs, we created our own commercial without gender prejudice.
