

Presentation of the European section

We want you!

The European section in Charles Tellier high school is composed of two extra class hours: one lesson of Physics and Chemistry in English and one lesson of English.

Rewarding
Instructive
Relaxing
Funny
Challenging
Motivating

Euro's activities :

In Physics/ Chemistry: -experiments

- learning some scientific vocabulary
- research on different scientists (biography, discovery, ...)
- cooking Anglo-saxon recipes
- handcrafting

In English: -reading in English

- projects for the school life
- games in English
- speaking with a native speaker

Cambridge Certification :

When you are in Euro, you can go for the Cambridge Certificate, it's **FREE** (only if you are in 2nd euro, or it's 50€): the certificate is made by Cambridge university and is acknowledged all of over the world !!!!

It asserts your English level from A2 to B1!

It's in 2 steps:

-Writing part

-Oral part

It's not really complicated

Benefits for the future :

- What are the benefits for your child to do the European section ?

First of all, your child will discover the culture and the lifestyle of English speaking countries. It will improve his/her language skills and open his/her mind to the foreign world.

Then, to get the European degree, your child will have to go for an oral exam but only the positive points count so, it helps to get the Baccalauréat!

If your child leaves high school with the European degree, they have better chances to get the orientation they want and they can show it on their resume (CV)!

So, come and join us!!
